Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is--or, rather, has been until now--our 21st century public square. We have used it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse was vital to restoring our former democracy.

Letting well financed interests build fast lanes for the few will harm all of us, and you know it because that's the whole purpose of dividing the Internet into haves and have-nots. Corporate voices will always be able to afford special access (as they do to the FCC!), while independent and non-profit voices suffer--all by design. The FCC must, but I'm sure will refuse to, reject any plan that allows corporate gatekeepers to control web traffic and should (but won't, of course!) recommit to the Open Internet by reclassifying broadband as a utility.

Sadly, it's pretty obvious that the FCC is thoroughly corrupt and will not act in the best interests of the people.

Sincerely,
Ms. Susan Hathaway

The Internet is the closest we have ever gotten to having a true "free press" in our country. It is absolutely vital, not only for us but for every other nation we can influence. And since it was created by our government, i.e., by our tax dollars, don't turn it over to mere businesses.

Thank you

Sincerely,
Mr. Charles Fox

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Frederick Mcatee

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Jeanne Shepler

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy. Further, the Internet has clearly risen past POTS in its importance to commerce and thus should be regulated as a public utility - with equivalent equality of service.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Michael Manes

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Equal access to the Internet has become as vital to political discourse as electric power itself. Please reclassify as the utility it has become.

Sincerely,
Sandra Peck

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. James Hopkins

Mr. Phil Wagner

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Maryann Preston

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

You must preserve net neutrality! Why should there be any doubt as to the right thing to do. Is the FCC another tool of BIG MONEY, the way so many other things are? I would hope for better things for this country. PLEASE do not go against the wishes of the entire public to further grease company pockets.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

I hope that you do not let us down. The public be damned, is not the right thing to do.

Sincerely,
Ms. Cecelia Vidmar

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Charles Smith

Lets be honest here, just for a moment. People connect on line, they live part of their lives there. They exchange ideas, they make friends, they do everything that people used to do in person, but it's become so hard to do otherwise. The internet has brought us together, in real and tangible ways. Lets keep it open and free, so that people can still have the chance to exchange ideas like we've become accustomed to.

Sincerely,
Mr. Scott Barlow

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Daniel Connolly

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

As an independent singer-songwriter, I depend on a free and open Internet for freedom of expression and communication with my fans.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

Of course business wants to pay for advantage - knowing that the little guy can't. Isn't this why grocery stores become big box stores - they want advantage. I don't want an internet composed of big box "stores". And, I'm sure the general public doesn't either.

Please protect the playing field - keep it open to the little guy and the big guy - both with equal access.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Maryanne Peaslee

Mrs. Susan Lambert
17300 Debbie Rd

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square; we Americans use it to inform ourselves about political candidates, debate issues and organize with other advocates (in addition to acquiring information on virtually every subject and engaging in commerce and personal communications). The Internet's role as a vibrant platform for public discourse is vital to our democracy.

We must have full, real and statutory Internet neutrality. Period.

Therefore, we demand that you protect us Internet users from the monopolistic ISPs. We Americans already "enjoy" the highest prices and worst service in the industrialized world; indeed, many so-called "developing" nations have far better service and far lower prices than we. The telecoms (like the Carbon Cartel) are raking-in profits; that money comes from US.

Do NOT permit telecom companies to censor, slow down, or block websites while requiring other sites to pay for faster service -- that is NOT the free and open Internet we deserve -- and that we demand.

Let me remind you, sir, that, irrespective of what five ruthless ideologues of the SCOTUS (and a certain failed presidential candidate) may opine, corporations are manifestly NOT people; WE CITIZENS ARE.

You must stand up for ALL Internet users and the right of us citizens to unfettered and fairly-priced telecommunications. THAT is what the FCC was originally created to do in the first place by the Communications Act of 1934 -- which would certainly have explicitly included the Internet, had it existed then.

Sincerely,
Mr. A.J. Averett

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Sharon Scott

Dear Commissioner Wheeler,

Dear Commissioner Wheeler & FCC Commissioners,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Net neutrality and mandated Universal Ultra-High Speed Internet/Phone/cable/satellite service is a tool needed to increase our educational level, Public Health level, maintain Worldwide Business and Governmental needs and for National Defense of our Electrical Grid, our communications grids, etc.

The first step needed is to hold public comment meetings in all Regional & District office areas so that you may gauge Public Opinion rather than DC opinion & Regulatee/Corporate opinion.

You are mandated to serve the Public Good and enhance the Public Policy discussion. To do that you may have to consider considerable Sherman Anti-Trust actions and limiting monopoly/duopoly/triopoly penetration of the Nation as a whole and each individual Broadcast/Marketing market.

Regulating Corporations, not catering to their wants is now necessary.

Thank you all very kindly for your time and attention and that of your fine staff.

Yours truly, Mr. Brett Greisen NYC 10025

Sincerely,
Mr. Brett Greisen

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Without a FREE INTERNET, I simply could not afford to use it.

Sincerely,
Miss Beverly Smith

Dear Commissioner Wheeler,

This is simple.

If you believe in freedom and the first amendment , you will keep net neutrality.

If you are against democracy, and pro Neocon/ Nazi, you will off course attack net neutrality.

The choice is freedom or fascism.

However that is got this far is fairly good proof the fix is in, and they are going to do it anyway.

Thanks

Chris Marshall

Even President Obama has publicly stated that a two-speed Internet is unacceptable. The stifling effects on economic innovation would be almost as dire as the stifling effects on democratic free expression. Our nation's future demands a free and open Internet, recognized as the public common-carrier service it is in actual fact.

Sincerely,
Mr. George Rappolt

Are we going to be a country of "the people, by the people, and for the people" or are we going to be a country of "the businesses, by the businesses, for the businesses"? Freedom of information from as many sources as possible is BASIC to our democracy!

Please have the political courage to stand for what is right and healthy for our democracy.

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

If you are at all in contact with reality, you know that our corporate media are useless as a source for honest information. We have not listened to network news for a decade. Don't let them sink their teeth into the internet at the expense of everyone else. The last nail in the coffin for America would be the loss of equal access to the net. This is the truth.

Act with wisdom, not in response to corporate vultures.

Rodney Dueck MD

Sincerely,
Dr. Rodney Dueck

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Barbara Jannicelli

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Rick Canning
